For standard Land Acquisition grants, PSCC support may only be requested under "Land Purchase Price".

*Closing Costs can include survey fees, title insurance, environmental assessment, legal assistance and recording fees. Extraordinary expenses under this category should be listed by themselves under "Other" and described here.

**Please limit the line item to that amount which your organization will set aside for this purpose during the grant period. The typical Land Acquisition grant period is 12 months unless otherwise requested and subsequently approved by PSCC. This expense category was provided for non-profit organizations. Government applicants should contact PSCC in advance of submitting a budget with this line item.
